Safe Travels

Terry's Ghost Hunting Guidelines:

- Rule 1:** If you see a spirit **DON'T PANIC** he/she is probably as afraid of you standing there with your beer belly and Bermuda shorts as you are of it.
- Rule 2:** Prepare a mental escape route in case you should need to get out in a hurry. Tripping over Granny and her walker will really slow you down.
- Rule 3:** You don't have to outrun the spirit/ghost, just that old codger next to you.
- Rule 4:** Never let anything "talk-through" you. If you give it permission to use your body, you're at risk and will probably require a 72 hours mental welfare hold.
- Rule 5:** If you – or someone you know – seems "possessed," **BE WARNED:** I am not calling you a priest, but rest assured I am leaving you standing there in the middle of the road.
- Rule 6:** If you hear a loud groan and smell sulfur **DO NOT PANIC** most likely someone in your group broke wind.
- Rule 7:** If you soil your pants don't come crying, moaning, complaining, or bitching to me. You're a grown up. Own it.
